EDUCATION

University of Central Florida

Bachelor of Science, Computer Science

Magna Cum Laude, GPA: 3.9

Relevant Coursework: DSA, Linear Algebra, Processes for Object-Oriented Software Dev, Web Dev, Mobile Dev

Orlando, FL

May 2026

EXPERIENCE

HCA Healthcare – Psycall Resident Scheduler (Senior Capstone)

September 2025 – May 2026

Project Manager/Frontend | C#, Next.js, TypeScript, ASP.NET Core, EF Core

- Led a team of 5 other developers using Scrum methodology in creating a rotation scheduler for medical residents, replacing an inefficient manual email-based process.
- Maintained and extended an existing app for the industry sponsor for Psycall at HCA Healthcare.
- Designed a submission form for residents, allowing resubmissions as needed before the admin-set deadline.
- Built a reusable React calendar component shared across two teams, giving admins the ability to manually override algorithm-generated rotation assignments per rotation.
- Integrated a backtracking scheduling algorithm to the frontend using a calendar component.
- Incorporated sponsor feedback across Scrum sprint reviews throughout the project.

PROJECTS

Power Level

February 2026

Solo Developer | FastAPI, Python, React, Claude API

- Designed and deployed a full-stack stat tracking application currently in active use, aggregating match data across multiple game types.
- Integrated Claude Haiku 4.5 to generate AI-powered tier lists and narratives based on user performance data.
- Parses game data to generate detailed statistics, including win rates, head-to-head matchup stats, team performance, and role-based breakdowns for each player depending on game type.
- Added support for a wide variety of games, handling different game formats and roles with user tags.
- Deployed and hosted live with a React frontend on Vercel and a FastAPI Python backend on Render.

Ping Pong!

April 2026

Solo Developer | FastAPI, Python, Javascript, SQLite, Claude API

- Created a full-stack Ping Pong-specific stat tracking application to measure matchups between friends.
- Developed an invite system to add users to play groups securely.
- Expanded on Power Level stat tracking with point differentials and total points between players.
- Integrated Claude Haiku 4.5 to generate AI narratives between players for user engagement.

TO BE REPLACED WITH BETTER APP HOSTED WITH AWS. ignore most likely.

November 2025

Solo Developer | MERN Stack (MongoDB, Express, React, Node.js), CSS

- Built a full-stack MERN blog application solo.
- Implemented JWT-based auth and admin-only actions.
- Structured the app with a RESTful Express API and React frontend.

PONG (could be removed since its not relevant but i like this project and can talk well about it)

April 2025

Solo Developer | Unity, C#

- Built a feature-complete PONG game in Unity with C# and deployed a build to itch.io.
- Created an opponent AI that uses raycasting to predict the destination of the ball.
- Recreated physics for the ball using colliders with logic scripts based on colliders and direction.
- Included full controller support with local multiplayer mode.

SKILLS

Programming: Python, JavaScript, TypeScript, Java, C, C#, HTML, CSS, SQL

Frameworks/Tools: React, Next.js, Tailwind, FastAPI, Unity, Git, Claude API
